Thanarit Chaiwatthana
Founder & Chief Executive Officer

HELLO! I'M THANARIT

The sole owner of Investment Lotto Insight Tech Startups Company. I'm a person who likes to see how people approach speculative investments, especially in lotteries.

I'm a seasoned Data Science and Machine Learning expert with over [X] years of experience building complex analytical models for leading technology companies. What truly sets me apart is not just my deep technical expertise, but also my genuine, first-hand understanding of the lottery market. This unique perspective is the driving force behind my company's mission: to turn the lottery from a game of pure chance into a game of strategy, all powered by our innovative Lotto Insight Engine.

In 2025, I successfully developed this proprietary engine, which is the intelligence behind my Lottery Trends AI web service. We've already seen tremendous success with our product prototype in Thailand, Laos, and Vietnam, demonstrating an impressive 80% accuracy in its insights. It uses advanced AI and data analytics to uncover hidden patterns in historical lottery data, providing unparalleled insights for speculative investors.

We're currently on a crucial mission to expand our Lotto Insight Engine globally, and we're inviting investors to join us. The investment window is open from July 10th to July 31st, 2025. Your \$500,000 seed investment will be the catalyst to hit our major goals in Years 1 and 2, building a scalable foundation that will reach profitability by Year 2, positioning us for a larger Series A round to fuel our global expansion. I'm excited to discuss how we can partner to achieve impactful and profitable growth together.

THE FOUNDER'S STORY: THE "AHA!" MOMENT

"For years, like millions of others, I bought lottery tickets. I used birthdays, anniversaries, and numbers I saw in dreams. In my professional life, I was using advanced algorithms to find signals in vast datasets, but in this personal pursuit, I was relying on pure luck. The 'aha!' moment came when I decided to apply my professional skills to my personal hobby.

I began analyzing historical lottery results as a side project, and the patterns that emerged were fascinating. It wasn't about finding a 'magic number' to guarantee a jackpot, but about identifying trends and statistical biases that could slightly, but significantly, shift the odds. I realized that the average player had no access to this kind of insight.

Lottery Trends AI was born from that simple idea: to democratize data analytics for the lottery. We're not selling impossible guarantees; we're selling empowerment. We're giving every player the same statistical edge that I discovered."

CORE STRENGTHS & EXPERTISE

- Data Science & Machine Learning: Expert in developing and deploying predictive algorithms.
- Statistical Modeling: Proven ability to identify non-obvious correlations in large datasets.
- Product Vision: A clear, user-centric vision for building a product that is both powerful and easy to use.
- Market Empathy: As an actual user, possesses an intuitive understanding of player psychology, pain points, and desires.
- Lean Execution: Experienced in building and testing prototypes efficiently to validate concepts before scaling.
